# Luis Enrique Preciado Muñiz

Guadalajara, México  
C.P 45200

[github.com/lepcodes](https://github.com/lepcodes) | [in linkedin.com/in/luispreciado](https://in.linkedin.com/in/luispreciado) | [portfolio.lepcodes.com](https://portfolio.lepcodes.com)

Analytical software developer with a strong background in machine learning, data science and full-stack development. I am dedicated to solving complex problems and am pursuing opportunities to contribute my skills to a team focused on creating high-quality, innovative products.

## Experience

### Software Engineer Intern

August 2023 – July 2024

#### Robert Bosch México

Guadalajara, México (Hybrid)

- Designed and implemented a Python and Rasa framework-based Chatbot to facilitate new developer onboarding and provide troubleshooting assistance, complete with a local SQL database for response management, a ChatGPT-based model API for enhanced query handling, and Github for version control.
- Automating report generation for fault-mapping between customer defined fault application and ECU's real monitors using Python scripts, leveraging Pandas, Anaconda, and fuzzy logic libraries, to ensure accurate tracking of monitor-fault mappings and to guarantee software quality deliverables.
- Developed scripts to cross-reference client requirements with ECU header files, identifying potential inconsistencies and streamlining the verification process.

**Key Metrics:** Enhanced quality of deliverables and improved efficiency by 40%, reducing inconsistencies by 90%.

### Robotics Intern

June 2022 – August 2023

#### Intelligent Systems Laboratory

Guadalajara, México

- Supported the development of research on consensus algorithms for the Turtlebot robot platform and other holonomic robots using motion capture technology, optical tracking (OptiTrack), and ROS drivers on a Linux environment.
- Extensively worked with Linux in the assembly, programming, and testing of UAV units, as well as the implementation of monocular and stereoscopic visual-inertial odometry algorithms focused on indoor flights.

**Key Metrics:** Modified existing ROS/ROS2 C++ drivers in a Linux environment to synchronize visual-inertial measurements and developed new drivers to control holonomic robots and UAV kinematics

## Education

### University of Guadalajara

Guadalajara, México

Master's Degree in Machine Learning and Artificial Intelligence

January 2025 – Currently

- Developing an EW-ACF-based forgetting mechanism for LSTM networks to optimize long-term memory retention in time-series forecasting systems through bio-inspired memory reset.

### University of Guadalajara

Guadalajara, México

Bachelor's Degree in Robotics Engineering

January 2020 – June 2024

- Bachelor's degree providing hands-on training in developing machine learning algorithms and robotic vision systems (Python, Matlab), designing and programming the underlying electronic circuits and embedded system (C/C++ and VHDL).

## Projects

### Avocado Ripening Prediction API | [Live](#) | [Github](#) | [API](#)

TensorFlow, FastAPI, Docker, React, MLflow, OCI

- Architected and developed an end-to-end application to predict the shelf life of avocados in days, leveraging a multi-input deep learning model that analyzes both an image and storage condition data.
- Implemented a computer vision model using TensorFlow, employing transfer learning with a CNN base fine-tuned on a custom dataset of avocado images to extract ripeness features.
- Containerized the Keras model and a serving API using Docker and FastAPI, and managed the model lifecycle and experiment tracking with MLflow on Oracle Cloud Infrastructure (OCI).

### Chat React Component | [Live](#) | [Github](#)

React, Next.js, Express, Tailwind CSS

- Engineered a modular React chat component, serving as the core user interface for a Fitness AI Assistant web application built with Next.js.
- Leveraged Tailwind CSS and CSS Modules to create a fully responsive, customizable, and visually appealing chat interface.
- Integrated the component with a back-end Express API to handle conversational logic and data exchange.

## Technical Skills

**Programming Languages:** Python, Javascript, Typescript, HTML, CSS, C/C++

**Technologies:** Tensorflow, PyTorch, Sckit-learn, Docker, Oracle Cloud, AWS, FastAPI, Pandas, React JS, Next JS, Node, Express JS,, Tailwind, SQLite, PostgreSQL, Supabase, Excel, PowerBI

**Tools:** Git, GitHub, Visual Studio Code, Fusion 360

---

## Certifications

---

- **Oracle Cloud Infrastructure 2025 AI Foundations Associate (1Z0-1122-25)** | *Issued: Aug 2025* | [Verify](#)
